### Educational and Background Information

As a YSSP participant, you will be associated with an IIASA research Program. Your proposed research, which should be relevant to the ongoing research activities of the Program you select, can also be a part of your Ph.D. work. The supervisor and the YSSP participant determine which aspect the participant should work on, what responsibilities are entailed, and the extent to which the participant will work independently.

The proposed research should be focused so that it can be supervised and completed during the summer.

Before filling out this form, please familiarize yourself with the [research agenda](#) of the research groups which will host the YSSP participants.
