science for global change donate & shape the future of our changing world

Donating to the IIASA Fund
will help us to support the
next generation of talented
young scientists to develop
tomorrow's solutions to
today's global problems

IIASA Development

For four decades IIASA has conducted independent and interdisciplinary research to find solutions to a host of scientific, social, and policy problems.

The IIASA Fund offers different avenues to support the Institute's mission. The support of our donors allows us to continue this important work and provides the opportunities for endeavors outside the Institute's budget.

- Donate to the **IIASA Annual Fund** to give talented young researchers from developing countries a chance to participate in the IIASA three-month Young Scientists Summer Program.
- Support the **Peter E. de Jánosi Postdoctoral Fellowship** and help us sponsor a two-year postdoctoral fellowship for a promising researcher.
- Make an unrestricted donation to the **IIASA Fund** and your gift will support innovative ideas and creative exploration of new frontiers in systems analysis.

Whichever you choose to support, your gift will allow IIASA to continue international and truly independent scientific investigation into today's global challenges.

www.iiasa.ac.at/donate

Located near Vienna, Austria, IIASA is an international institute that conducts policy-oriented research into problems that are too large or complex to be solved by a single country or discipline. These problems—which include climate change, energy security, and sustainable development—must be resolved by international cooperation. IIASA research comes under the following programs:

- Advanced Systems Analysis
- Air Quality and Greenhouse Gases
- Ecosystems Services and Management
- Energy
- Evolution and Ecology
- Risk and Resilience
- Transitions to New Technologies
- Water
- World Population.
