Publication Statistics

The number of journal articles authored by IIASA researchers and the citations of these articles has increased significantly since 2002 as shown in the chart (right) based on data through May 2014.

This trend is continuing in 2014: at the end of October there were 205 peer-reviewed journal articles by IIASA authors and 7,514 citations of journal articles by IIASA authors. As a comparison, the respective numbers for the complete year 2013 were 254 journal articles and 8867 citations.

The **h-index** measures the productivity and impact of journal articles published by an author or institute. IIASA's h-index is 93, meaning that of all IIASA journal articles, 93 articles have been cited more than 93 times.
