Abstract

Proposed research plan during your intended work at IIASA

An essential part of the application is your proposed research plan which should be relevant to the research agenda(s) of your selected programs.

Please fill out the boxes below (max 2500 characters) to describe in detail how your research objectives relate to your selection and how your background and skills qualify you for the program. Note: if you need to add more information you can upload another pdf in the CV section.

For scientific questions please contact the relevant program representatives.
