UNECE Air Convention (LRTAP) 3th Expert Panel on Clean Air in Cities (EPCAC) 29 November 2021 (online)

Agenda

| 9:00 - 9:05 | Welcome – Guus Velders & Roald Wolters (Co-chairs EPCAC) |
|---|---|
| 9:05 - 9:15 | Introduction to EPCAC – Roald Wolters |
| | Part 1 – News - Updated WHO Guidelines and EU air quality revision |
| 9:15 - 9:40 | 1. Roman Perez Velasco (WHO) - WHO global air quality guidelines 2021: Setting ambitious goals for air quality to protect public health |
| 9:40 - 10:05 | 2. Michael Klinkenberg and Johanna Lindner (EC) - Air quality – revision of EU rules |
| | Part 2 - Source apportionment and multi-scale air quality modelling |
| 10:05 - 10:30 | 3. Bruce Rolstad Denby (Met.no) - Recent applications of uEMEP for fine scale modelling in Europe |
| 10:30 - 10:55 | 4. Philippe Thunis / Enrico Pisoni (JRC) - The 2021 Urban PM2.5 Atlas, are cities responsible for their air pollution? |
| 10:55 - 11:20 | 5. Ranjeet Sokhi (Univ. Hertfordshire) - Sensitivity of air quality to emissions changes – contribution to FAIRMODE Cross-cutting Task 9 on Air Quality Model Projections |
| 11:20 - 11:35 | Coffee break |
| | Part 3 - Multi-level governance: cooperation between local and national level |
| 11:35 - 12:00 | 6. Karin Blaauw (Dutch Ministry of Infrastructure and watermanagement) - Multi level agreement on clean air in the Netherlands |
| 12:00 - 12:25 | 7. Joanna Struzewska (Warshaw Univ of Techn.) - Joint effectiveness of the local/regional air quality plan: projected exposure in 2022 and 2026 in Poland |
| | Part 4 - Modelling and monitoring requirements for policies |
| 12:25 - 12:50 | 8. Christian Nagl (Umweltbundesamt – Environment Agency Austria Vienna) - NO_2 exposure in Austrian cities – comparison of different methods |
| | |
| 13:00 - 14:00 | Lunch break |
| 13:00 - 14:00 | Lunch break Part 4 - Modelling and monitoring requirements for policies, continued |
| 13:00 - 14:00 14:00 - 14:25 | |
| | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on |
| | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK |
| 14:00 - 14:25 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions |
| 14:00 - 14:25 14:25 - 14:50 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story – from pea-souper |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 15:15 - 15:40 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story - from pea-souper smogs to the Ultra Low Emission Zone |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 15:15 - 15:40 15:40 - 16:05 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story – from pea-souper smogs to the Ultra Low Emission Zone 12. Levente Molnar (EEA) - Clean air in cities - case studies on air quality measures |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 15:15 - 15:40 15:40 - 16:05 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story – from pea-souper smogs to the Ultra Low Emission Zone 12. Levente Molnar (EEA) - Clean air in cities - case studies on air quality measures Break Part 6 - What lessons can be learned from emission reductions during corona |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 15:15 - 15:40 15:40 - 16:05 16:05 - 16:20 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story – from pea-souper smogs to the Ultra Low Emission Zone 12. Levente Molnar (EEA) - Clean air in cities - case studies on air quality measures Break Part 6 - What lessons can be learned from emission reductions during corona lockdown? 13. Ilaria D'Elia / Massimo D'Isidoro (Italian National Agency for New Technologies, ENEA) - The effects of lockdown measures on air quality in Italy based on model |
| 14:00 - 14:25 14:25 - 14:50 14:50 - 15:15 15:15 - 15:40 15:40 - 16:05 16:05 - 16:20 16:20 - 16:40 | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story – from pea-souper smogs to the Ultra Low Emission Zone 12. Levente Molnar (EEA) - Clean air in cities - case studies on air quality measures Break Part 6 - What lessons can be learned from emission reductions during corona lockdown? 13. Ilaria D'Elia / Massimo D'Isidoro (Italian National Agency for New Technologies, ENEA) - The effects of lockdown measures on air quality in Italy based on model simulations 14. Lara Aleluia Reis (RFF-CMCC European Institute on Economics and the Environment) - COVID-19 lockdown only partially alleviates health impacts of air |
| 14:00 - 14:25 $14:25 - 14:50$ $14:50 - 15:15$ $15:15 - 15:40$ $15:40 - 16:05$ $16:05 - 16:20$ $16:20 - 16:40$ $16:40 - 17:00$ | Part 4 - Modelling and monitoring requirements for policies, continued 9. Daniel Mehlig (Imperial College) - Electrification of road transport and the impacts on air quality and health in the UK Part 5 - Actions at the city level, experiences linking air and climate actions [Not given: Sebastian Lange (UN Habitat) - Ongoing work on clean air in cities] 10. Beatriz Cárdenas (WRI) - Work being done in cities in the global south 11. Elliot Treharne (City of London) - London's air pollution story - from pea-souper smogs to the Ultra Low Emission Zone 12. Levente Molnar (EEA) - Clean air in cities - case studies on air quality measures Break Part 6 - What lessons can be learned from emission reductions during corona lockdown? 13. Ilaria D'Elia / Massimo D'Isidoro (Italian National Agency for New Technologies, ENEA) - The effects of lockdown measures on air quality in Italy based on model simulations 14. Lara Aleluia Reis (RFF-CMCC European Institute on Economics and the Environment) - COVID-19 lockdown only partially alleviates health impacts of air pollution in Northern Italy 15. Alexandra Monteiro (University of Aveiro) - Air quality & COVID pandemic: lessons |
