

Nelson Torto is the Executive Director of The African Academy of Sciences. The AAS is a non-aligned, non-political, not-for-profit pan African organisation whose vision is to see transformed lives on the African continent through science. Under his leadership, the goals of The AAS are to promote partnerships, mobilise the African scientific community, lead science advocacy efforts and ensure research findings are incorporated into policymaking so that science remains at the forefront of the African agenda and is adequately supported to transform people's lives.

He was the founding CEO of the Botswana Institute for Technology Research and Innovation. He was also the Founding Director of the Centre for Scientific Research Indigenous Knowledge and Innovation, credited with the establishment of the indigenous knowledge policy for Botswana. He has had an illustrious academic and research career and has graduated 19 PhD students during his tenure at the University of Botswana and Rhodes University.

He has a PhD in analytical chemistry from Lund University in Sweden, MSc from the University of Botswana and a BSc (Hons) Chemistry from the University of Manchester in the United Kingdom. He has received several international awards and has held various positions in African and international networks and organizations.
